

Date: March 31, 2009

Endeavour, an ISO 9001-2000 certified company, provides niche services on Enterprise Mobile Consulting, offshore custom mobile application development and outsourced product development and execution.

We came in touch with eBrandz through information on the internet and then we were able to obtain further information on their services by reviewing their website and newsletters.

We signed up for their Google Adwords service. We were able to witness increase in traffic on our website. The services of eBrandz helped us keep up with the latest in optimization techniques. eBrandz services are up to the mark and make sure of the complete satisfaction of their customers. Their services are very prompt and take utmost care in replying to our queries and questions.

We would certainly like to recommend the services of eBrandz to others and would like to congratulate the eBrandz team on keeping up their good work.
