Dreamy Weddings & Tours is an internet based destination wedding planning company offering various Caribbean islands as wedding locations. We were interested in search engine optimization and did some research into companies offering SEO services but wanted a company in India. The reason for Ind is that we believed that companies in India had a competitive edge in their knowledge base and service.

We found eBrandz and a few other companies from an SEO member's web site which listed various companies around the world offering such services. At first I was skeptical but we too are an internet based business operating from the Caribbean and their payment policy gave us some calm over dealing with a company so far away. It was also good to know that they have an office in New York as well as Ind.

I found eBrandz to be very responsive and to date we have seen a dramatic increase in our ranking only after 3 months. The team has worked very well with us and we look forward to better relations in the future.

Since we are an internet based company, most of our leads come through the internet. We have seen an increase in requests which state that they found our site thru a web search. That certainly shows that the SEO program we have embarked upon with eBrandz is working.

eBrandz, in our opinion is among the top companies offering SEO services and they are responsive to all our questions in record time. Hence we would definitely recommend eBrandz to other companies.
