

Date: December 15, 2006

We are a hosting company. We knew of SEO for quite a while but we weren't aware of any reasonable solution. We knew SEO was good because PPC performance can be questionable. We went to the search engine Google and researched a few SEO companies. eBrandz was one of the top listings on Google.

eBrandz site looked much better, they were available for discussion. They seemed much more complete, trustworthy, and professional. Hence we signed up with them. Yes, we were concerned that it was a bit of a gamble prepaying for ANY service...but it turned out great. We've worked with other Indian based companies for various things and it's like anything else, it depends on the particular company. eBrandz was spot-on. No issues whatsoever. They did what they said they would, when they said they would. Great response and service all the way around. We started seeing improvements in traffic within a few months. We believe that the work eBrandz did helped us increase our overall website traffic and over time we experienced more customer inquiries and more orders.

Yes, we have already recommended eBrandz and would continue to do so to others in future.

A handwritten signature in brown ink, appearing to read "Paul Culbertson", with a long horizontal flourish extending to the right.

Thank you,
Paul Culbertson
