

Date: April 2, 2007

We are engaged in the business of providing combined yet powerful web solutions from web designing, programming, and ecommerce to web hosting for small and big business around the globe. We knew about the cumulative process of Search Engine Optimization for a long time but were never able to make effective headway on our own.

While our website did not have traffic, we conducted a standard Google search for "SEO", "Search Engine Optimization" looking for a company that had knowledge, skills, experience and resources to carry out the job. Fortunately, we were recommended to eBrandz.com by a successful client -- and being the first service used, we are proud to let you know that without eBrandz we definitely would not have achieved our goals with search engines like Google!

Our overall experience with the services of eBrandz has been excellent! Their friendly and helpful customer service representatives promptly solve any issues or concerns with quick and satisfactory response. eBrandz has enabled us to pinpoint the effects of our optimization efforts so well that in only a few months our site is now a strong competitor in our target market. Besides, we have never had any problem with international companies who accept credit card payment.

We have never seen anything like eBrandz! They have helped us grow our business enormously, and the support was professional and friendly all the way. In about 3 to 4 months we witnessed the realistic difference in website traffic and in addition we have had an increased number of unsolicited quote requests from search engines.

Working with eBrandz has been a pleasure and we recommend their Search Engine Optimization services to any company looking to start or expand their Internet Businesses.

A handwritten signature in black ink, appearing to be "Corbin Bristow", with a long horizontal line extending to the right.
